
Iterative Receiver Design

iterative receiver design - assets - iterative receiver design

iterative processing is an important technique with applications in many fields, including digital communications, image processing, and machine learning. **iterative receiver design with off-the-grid sparse channel ...** - iterative receiver design and off-the-grid sparse channel estimation to derive a receiver that merges these two techniques. several prior works incorporate sparse channel estimation in an iterative receiver. in [20], [21] a joint sparse channel estimation and detection scheme is proposed. channel decoding **analytical design of iterative receiver for ...** - *ijpres* - receiver performance, the iterative receiver obtains the additional diversity gain by exploiting the signals in both the positive sub frame and negative sub frame. the simulation results show that the iterative receiver with only two iterations provides a significant snr gain over the conventional receiver. **low complexity iterative receiver design for ofdm systems** - receiver design which is fundamental to any communication system is ever more relevant. turbo iterative receivers (ir) are based on the observation that performance of the system can be significantly improved if detection and decoding are combined together. they, in general, are found to have superior performance compared to other solutions. **a survey of information geometry in iterative receiver ...** - a survey of information geometry in iterative receiver design, and its application to cooperative positioning . master of science thesis in communication engineering . dapeng liu . department of signals and systems . chalmers university of technology . göteborg, sweden, 2012 . **iterative receiver design: joint synchronization and ...** - nezami/09 iterative receiver design: joint synchronization and decoding dr. mohamed k. nezami ﻣﻮﮪﻤﻪﺩ ﻛﻪ ﻧﯩﺰﺎﻣﻲ philadelphia university, **iterative transmitter and receiver optimization for cdma ...** - manner. in this paper, we develop iterative transmitter and receiver design algorithms, based on the optimization of the mse function. the major difference of the mse from the sum capacity and the twsc is that the mse depends on both the transmitters (signature sequences) and the receivers (receiver filters). **performance, complexity, and receiver design for code ...** - an iterative receiver is presented which integrates frame synchronization with iterative channel estimation, equalization, demodulation, and decoding. the receiver design includes a novel frame pre-processing stage to reduce the complexity of the proposed receiver. the complexity and performance of the proposed receiver is compared with that **iterative receiver design for mimo systems with improper ...** - iterative receiver design for mimo systems with improper signal constellations pei xiao, mathini sellathurai the institute of electronics, communications and information technology queen's university belfast, bt3 9dt, united kingdom e-mail: fpei.xiao, mlathuraig@ecit.qub abstract In this paper, we propose a novel iterative receiver **iterative receiver design with joint carrier-frequency ...** - wireless pers commun (2012) 62:127–138 doi 10.1007/s11277-010-0043-3 iterative receiver design with joint carrier-frequency offset and channel estimation for ldpc-coded **ieee transactions on communications, vol. 65, no. 2 ...** - low complexity iterative receiver design for sparse code multiple access fan wei and wen chen, senior member, *ieee abstract—sparse code multiple access (scma) is one of the most promising methods among all the non-orthogonal multiple access techniques in the future 5g communication. compared with some other non-orthogonal multiple access ...* **aalborg universitet combined message passing algorithms ...** - combined message passing algorithms for iterative receiver design in wireless communication systems ph.d. dissertation chuanzong zhang aalborg university department of electronic systems fredrik bajers vej 7b dk-9220 aalborg **improved modulation classification using a factor-graph ...** - tion classification and iterative receiver design. in this work, these topics are joined within the framework of factor graphs which provide a unified approach to representing a variety of algorithms, especially iterative algorithms. specifically, in this paper we present a factor graph which incorporates modulation
